Local minimum found that satisfies the constraints.

Optimization completed because the objective function is non-decreasing in feasible directions, to within the selected value of the function tolerance, and constraints are satisfied to within the selected value of the constraint tolerance.

Multiple local minima

Your initial point x_0 is not between bounds lb and ub; FMINCON shifted x_0 to strictly satisfy the bounds.

Local minimum possible. Constraints satisfied.

fmincon stopped because the size of the current step is less than the default value of the step size tolerance and constraints are satisfied to within the selected value of the constraint tolerance.

Your initial point x_0 is not between bounds lb and ub; FMINCON shifted x_0 to strictly satisfy the bounds.

Local minimum possible. Constraints satisfied.

fmincon stopped because the size of the current step is less than the default value of the step size tolerance and constraints are satisfied to within the selected value of the constraint tolerance.
